**Cape Breton Weather Watching: An Atmospheric Odyssey**

by

Bill Danielson  
Retired Professor of Meteorology  
University of Hartford

Monday, October 1, 2007 at 4:00 pm  
Room 135 Sir James Dunn Building,  
Physics Department, Dalhousie University, Halifax

**Abstract**

Cape Breton is a real-time weather museum. Travelling the Island, you might catch the green flash in Green Cove, mirages off Money Point, fog in Fourchu, Suête winds in Cheticamp, crepuscular rays in Creignish, and still be home in time for supper. This talk will illustrate and comment on many such spectacles, which can ignite and sustain our fascination in the atmospheric sciences.
